“Predictable Peri-implant Gingival Aesthetics Following Extraction, Implant Placement, & Immediate Provisionalization in the Anterior Aesthetic Zone.”

Dr Robert Margeas
Dr. Margeas will provide insight on immediate extraction, implant placement, and provisionalization in the anterior aesthetic zone. Learn how to provisionalize immediately, utilizing the patients natural tooth on the abutment following implant placement. This lecture will focus on preserving papilla and soft tissue along with learning different techniques to provisionalize for maximum aesthetics. Aspects related to diagnosis, treatment planning and predicting esthetic outcomes will be addressed in great detail. Numerous cases step by step will be shown. This presentation is for the everyday dentist who wants to utilize implants in their practice. Practical techniques which can be incorporated immediately will give the dentist the confidence to restore implants.

Learning Objectives:
- Learn the 5 determinants for predicting esthetic outcomes with immediate implants.
- Introduce a simple technique to reline the natural tooth for immediate provisionalization.
- When to use orthodontics to increase the esthetic outcome.
- Alternative provisionalization techniques when the natural tooth can not be utilized.

Biography:
Dr. Margeas graduated from the University Of Iowa College Of Dentistry in 1986 and completed his AEGD residency the following year. He is currently an adjunct professor in the department of Operative Dentistry at the University of Iowa. He is Board Certified by the American Board of Operative Dentistry and is a Fellow of the Academy of General Dentistry. He has written numerous articles on aesthetic and implant dentistry and lectures and presents hands-on courses on those subjects. He serves on the Editorial Advisory board of Inside Dentistry, Functional Esthetics & Restorative Dentistry, and is a contributing editor to Dentistry Today and Oral Health in Canada. Dr. Margeas maintains a private practice focusing on comprehensive restorative and implant dentistry in Des Moines, Iowa.
"ENDO 101"

Dr Noah Chivian

The key to successful Endodontics is a grasp of the basic principles of treatment. Meticulous attention to detail in following the dictates of the Endodontic Triad, microbial control, cleaning & shaping, and seal of the canal system is a requirement to achieve this goal. ENDO 101 presents a philosophy of treatment grounded in these principles and coupled with over forty-five years of clinical experience. Today’s technological advances are integrated with these basic principles to achieve endodontic success with more ease, decreased stress, in less time and with greater consistency of achieving favorable results. This approach is compatible with all of the rotary instrumentation systems available today. Seal of the canal system, the base of the Endodontic Triad, will be explored with emphasis on the latest instrumentation and materials.

Biography:
Dr. Noah Chivian attended Franklin and Marshall College and received his dental degree from the University Of Pennsylvania School Of Dental Medicine. He was a Research-Teaching Fellow in Endodontics and received his certificate in Endodontics from Temple University School of Dentistry. He is a member of Omicron Kappa Upsilon, a Fellow of the American and International Colleges of Dentistry, a Fellow of the American Association of Endodontists, a Diplomate of the American Board of Endodontics, an honorary member of the Societe Francaise d’Endodontie, and a recipient of the Warren T. Wakah Award from the Japanese Endodontic Association. Dr. Chivian received the Alumni Award of Merit from the University Of Pennsylvania School Of Dental Medicine and the Edgar D Coolidge Award from the American Association of Endodontists. In addition to maintaining a private practice limited to Endodontics in West Orange, New Jersey, Dr. Chivian is an attending in Endodontics in the Department of Dentistry at the Newark Beth Israel Medical Center. He was formerly Director of Endodontics and Director of Dentistry at the same institution. He is also an Adjunct Professor of Endodontics at both the University Of Pennsylvania School Of Dental Medicine and the New Jersey Dental School (UMDNJ). Dr. Chivian is Past President of the American Association of Endodontists, the American Academy of Esthetic Dentistry, and the American Association of Endodontists Foundation. He presently serves on the Board of the Essex County Dental Society Education Foundation.

He has contributed to 14 Dental textbooks and his papers have appeared in: JADA, OOO, and Journal of Endodontics, Compendium and American Journal of Orthodontics & Dentofacial Orthopaedics. Dr. Chivian was a member of the Editorial Board of “Dental Traumatology” for 20 years and presently serves on the Editorial Boards of “Journal of Esthetic and Restorative Dentistry” and “Practical Procedures and Aesthetics” and “Dental Products Report.” Video Corporation of America produced his television teaching tapes, “Endodontics- the Total Concept” and “New Wave Endodontics”. His presentation “Posts and Removing Posts” appears online at Dentrek.com. Dr Chivian presented “How to have a Positive Endodontic Experience” as an Alpha Omega Web cast, 11/02, and it is archived on the AO Website. Dr. Chivian has presented lectures, seminars, and web casts on all phases of Endodontics at Universities and Dental meetings throughout North and South America as well as Germany, Greece, France, Holland, Israel, Japan, and Switzerland.
“Tips and Tricks for the Adhesive Cementation of Ceramic Veneers, Inlays, and Onlays.”

Dr Ed McLaren
This presentation will cover very clinical useful techniques for bonded ceramic restorations.

Learning objectives:
1. Tips and techniques for direct provisionalization and how to seal teeth to prevent sensitivity if dentin is exposed.
2. How to try-in and fit restorations
3. Techniques for a carrying device to “hold” the restoration
4. Techniques for adjusting contacts
5. How to judge color and adjust if necessary using cement color modifiers
6. Techniques for gingival isolation during cementation
7. Techniques for interproximal isolation
8. Cement choices and use.
9. Cleaning up the cement and adjusting occlusion

Biography:
Dr. McLaren attended the University of Redlands where he graduated Phi Beta Kappa and Magna Cum Laude. He received his D.D.S. from the University of the Pacific School of Dentistry, where he graduated Omicron Kappa Upsilon. After several years of general practice, he received his specialty certificate in Prosthodontics from UCLA School of Dentistry. Dr. McLaren maintains a private practice limited to Prosthodontics and esthetic dentistry in which he does all of his own ceramics. He is the director of the UCLA Center for Esthetic Dentistry, a full time didactic and clinical program for graduate dentists. He is also the founder and director of the UCLA Master Dental Ceramist program. The residency program is a full time master ceramist program for dental technicians featuring extensive experience with the newest esthetic restorative systems. Dr. McLaren has an appointment as an Associate Professor in the Biomaterials and Advanced Prosthodontic department. He is also an Adjunct Assistant Professor for the University of Oregon Dental School.

Dr. McLaren is a member of the American College of Prosthodontists, Pacific Coast Society of Prosthodontists, International College of Prosthodontists, Fellow of the American Academy of Esthetic Dentistry, International Society of Dental Ceramics, International Association of Dental Research, American Association of Dental Research, American Dental Association, and the California Dental Association. Dr. McLaren is actively involved in many areas of prosthodontic and materials research and has published several articles. He is performing ongoing clinical research on various restorative systems. He has presented numerous lectures, hands-on clinics and postgraduate courses on ceramics and esthetics across the nation and internationally.
Dr Ed Swift
This presentation will review the state of the art in resin-dentin adhesion. It three fundamental steps required for bonding resins to dentin, and the four for employing these fundamental steps. The advantages, disadvantages, clinical performance, and potential problems of each approach will be discussed.

Learning objectives
The participant will learn about:
• The functions that must occur for bonding resin-based materials to dentin
• The different strategies for accomplishing these steps.
• The advantages and disadvantages of each approach.

Biography:
Dr. Ed Swift received his D.M.D. degree from the Medical University of South Carolina and a master’s degree in Operative Dentistry from the University of Iowa. He is currently Professor and Chair of the Department of Operative Dentistry at the University of North Carolina.

Dr. Swift is actively involved in dental materials research, particularly in the area of dentin bonding and other aspects of adhesive and esthetic dentistry. He is a member of various professional organizations, including the Academy of Operative Dentistry, and the International Association for Dental Research. He is a fellow of the American Academy of Esthetic Dentistry and the Academy of Dental Materials. Dr. Swift serves on the editorial boards of Operative Dentistry, American Journal of Dentistry, Practical Procedures and Aesthetic Dentistry, and The Dental Advisor and is the associate editor for the Journal of Esthetic and Restorative Dentistry.

Dr. Swift has published over 185 journal articles and has written ten textbook chapters. He has also presented many scientific papers and continuing education courses regionally, nationally, and internationally.
“Interdisciplinary Orthodontics and Cosmetic Dentistry: for adults only?”

Dr David Sarver

Enormous strides have been made in collaborative restorative and esthetic treatment in adults in the past decade, and the lessons we have learned have opened our eyes to many treatment alternatives. However, the majority of the orthodontic practices treat growing children; the adult restorative patient is not the norm. How have these technological advances influenced how we treat children? How do we treat missing laterals now in the 14-year-old? When is the best time for implants, and are they the best option in every case? Are veneers a viable option in a younger patient? And, finally, who decides what “best treatment” is? To address these clinically important issues, Dr. Sarver will explore the many clinical variables orthodontists face and will present reasonable options where collaboration with the restorative dentist can result in better case management and outcomes.

Biography:
Dr. Sarver received his DMD from The University of Alabama School of Dentistry and M.S. in Orthodontics from the University of North Carolina in 1979. He is a Diplomate of the American Board of Orthodontics, a member of the Edward H. Angle Society of Orthodontists, and a Fellow in both the International and American Colleges of Dentists. In addition to his private practice, Dr. Sarver has authored or co-authored over 60 scientific articles, 12 book chapters, and his book, "Esthetics in Orthodontics and Orthognathic Surgery" was published in September, 1998. He is also co-author (with Dr. Proffit and White) of the new surgical text “Contemporary Treatment of Dentofacial Deformity”, published by Mosby, Inc. and is co-author the 4th edition of Proffit’s classic textbook “Contemporary Orthodontics”. In 2003 his 2 part article, co-authored with Dr. Marc Ackerman on smile analysis won the 2004 B.F. Dewel Award for the best clinical article in the American Journal of Orthodontics and Dentofacial Orthopedics. He has given more than 250 professional presentations in the United States, Europe, Australia and the Middle and Far East including both the Salzmann and Mershon Lectures at the AAO. Dr. Sarver has recently been featured on NBC’s “The Today Show”, ABC’s “The View”, and Fox News. David's wife, Valerie, worked 23 years as a Systems engineer with IBM. Their daughter Suzanne (18) is a student at Appalachian State University. Daughter Leigh (19) studies at the Savannah College of Art and Design, and son Dave(25) is pursuing postgraduate work at UAB after his graduation from Auburn in Mechanical Engineering.
**“Current Treatment Options for Discoloured Teeth”**

**Dr Ronald Goldstein**

Can you really give your patients with discoloured teeth the million dollar smile they dream of? Despite all the existing advances in conservative esthetic dentistry, the problem of successfully treating discoloured teeth is still prevalent in the profession. In a survey of patients, their most frequent complaint was their discoloured teeth. Not by coincidence, this same study found that the dominant concern of dentists was the treatment of discoloured teeth. Through maximum usage of bleaching, bonding, laminating and crowning, the dentist can alter virtually all discoloration aspects of the smile, ranging from mild to severe. However, knowing which treatment to use, when and where, is still a question of judgment. This course will highlight diagnosis and treatment of some of the major esthetic problems encountered, including treatment planning and step-by-step procedures to accomplish the most in the least amount of time. Dr. Goldstein will also present a new comprehensive approach to management of patients with discoloured teeth.

**Biography:**

Dr. Ronald Goldstein is currently Clinical Professor of Oral Rehabilitation at the Medical College of Georgia School of Dentistry, Augusta, Georgia; Adjunct Clinical Professor of Prosthodontics at Boston University Henry M. Goldman School of Dental Medicine; Adjunct Professor of Restorative Dentistry at the University of Texas Health Science Center at San Antonio, and formerly a Special Lecturer in Esthetic Dentistry at Emory University School of Dentistry, Atlanta, Georgia, as well as former Visiting Professor of Oral and Maxillofacial Imaging and Continuing Education at the University of Southern California School of Dentistry. Dr. Goldstein has presented continuing education courses at more than twenty universities and lectured at over 400 dental meetings throughout the world. He is a contributor to ten published texts and author of the text Esthetics In Dentistry, published by BC Decker. He is co-author of other texts, including Bleaching Teeth, Porcelain Laminate Veneers, Porcelain and Composite Inlays And Onlays, Complete Dental Bleaching, and Imaging in Esthetic Dentistry – all published by Quintessence Publishing. His best-selling consumer book, Change Your Smile, now in its third edition, is also published by Quintessence, and has been read by over 1,000,000 people and has been translated into eight languages. He is past editor of the “In Practice” column of Contemporary Esthetics and Restorative Practice and past co-editor-in-chief of the Journal of Esthetic Dentistry. He is also on the Editorial Boards of Dentistry Today, Inside Dentistry, and Dimensions of Dental Hygiene.

Dr. Goldstein served three years as resident dental consultant and produced over 70 consumer-oriented programs on dentistry for the popular television show "PM Magazine." He has also been featured in over 50 dental video productions. His "Anterior Fixed-Restoration Esthetic Principles" made for the American Dental Association, was winner of the 1982 John Muir Medical Film Festival Award for Dentistry. In recent years he was featured on the Discovery Health Channel’s program, “The Painless Dentist” and ABC’s 20/20 documentary on cosmetic dentistry. He also is author of the column “Beauty Matters” in Southern Seasons magazine, as well as on the Editorial Advisory Board for New Beauty magazine. He is co-founder and past-president of the American Academy of Esthetic Dentistry, past-president of the International Federation of Esthetic Dentistry, and past-president of Alpha Omega International Dental Fraternity. He is a member of the American Academy of Fixed Prosthodontics, the American Association for Dental Research and the International Association for Dental Research. Dr. Goldstein is a Fellow of the American College of Dentists, The International College of Dentists, an Honorable Fellow of the Georgia Dental Association, and an honorary member of OKU Scholastic Fraternity.
