If you want better team communication and implants that seat cleanly without numbing or food traps with a workflow that is tuned for peak performance, **Then this program is for you.**

Course Description

Less appointments, less parts, better team communication and implant crowns and full-arch restorations that drop into place without numbing or food traps. Specialists can provide a more efficient process and better value to their referring partners. General dentists and their patients can enjoy ideal restorative outcomes with a workflow that is tuned for peak performance.

Learning Objectives:

- Demonstrate the specific advantages of anatomical healing abutments in immediate implant treatment.
- Practical tips for utilizing digital workflow to reduce the number of patient visits and increase implant case acceptance.
- Indications for use of anatomical healing abutments and custom milled final abutments.
- Improve healing response by reducing the number of times abutments are removed.
- Discover the benefits of the digital workflow using photogrammetry for both patient and clinicians.
- Review full-arch surgical and restorative workflows utilizing CHROME GuidedSMILE™.

Speakers:

Jim Keegan

Jim is the Digital Workflow Manager at Vulcan Custom Dental, providing technical guidance and digital dentistry training to labs and dentists.

Chris Moore

Chris is the Director of Business Development at ROE Lab. With 18 years of dental experience, he guides clinicians on the latest surgical and restorative workflows.
