12pm and 3pm EST

Live Zoom Webinar

Speaker: Dr. Joc Jernigan

If you're ready to make overdentures faster, simpler and more predictable by going fully digital, **then this course is for you.**

Course Description

This one-hour continuing education program explores how the latest digital technologies are transforming the workflow for overdenture cases and making overdenture treatment a more practical option for dental professionals.

Participants will learn how intraoral (IOS) scanning and the ArchBridge for Overdenture scan body system work together to create a streamlined, fully digital overdenture process that eliminates analog records and chairside pickups.

The program also reviews the traditional surgical and restorative workflow, the challenges associated with analog records and lab processing, and the clinical advantages of going digital. Attendees will leave with a practical understanding of how a fully digital overdenture workflow can reduce turnaround times, improve patient satisfaction and have a significant effect on practice success.

Learning Objectives

- Discuss the traditional surgical and restorative workflow for overdentures.
- Review the challenges of analog records and dental lab processing of an overdenture vs. in-office chairside pickups.
- Understand the advantages of a fully digital workflow for your overdenture cases.
- Explore how the ArchBridge for Overdenture scan body system simplifies digital data capture for predictable overdenture fabrication.

Dental Implant Trainers, LLC is a Nationally Approved PACE program for FAGD/MAGD credit. Approval does not imply acceptance by any regulatory authority or AGD endorsement. The current term of approval extends from 4/1/2024 to 3/31/2027. Provider ID# 386016

Presented by:
Dr. Joc Jernigan

Dr. Joc Jernigan is a fellow of AAID, who practices at DentureCare & Implant Solutions in Rocky Mount, NC, where he focuses on the surgical and prosthetic aspects of implant treatment for partially and fully edentulous patients.

He serves as an instructor for 3D Dentists' Full Arch Express programs and has extensive experience in digital dentistry, CAD/CAM workflows and 3D printing, with a passion for making advanced implant therapies practical and predictable for everyday clinical practice.
