

ROE Designs Dental Products for Doctors to Print In-Office

An increasing number of doctors are purchasing equipment to fabricate dentures, splints, and surgical guides in-office. Simply send ROE your digital or analog records and we will create a ready-to-print .STL file for you to print and finish in-house.

Denture Design Service

Ready-to-print digital denture case files can be generated from patient records such as doctor scanned models or bite blocks, CBCT, or IOS of the denture(s).

	per arch	
Digital setup for traditional/immediates	\$70	1 day in lab
Reverse reset	\$20	1 day in lab
Custom tray	\$15	1 day in lab

Splint Design Service

Digital splint design is now available. Upload digital impressions or send master casts to ROE to be digitized. We will email you an .STL file(s) for you to print and finish in-house.

	per arch	
Digital design	\$34	1 day in lab
add boxed model	\$18	1 day in lab

Surgical Guide Design Service

ROE provides implant surgical guide .STL files for as little as \$70 from planned cases. Cases are pre-planned by ROE and include a live planning session. Once the case is finalized, the .STL is emailed to the office to print.

CT surgical planning (1 implant)	\$90	3 days in lab
each add'l implant	\$20	
.STL of surgical guide from plan	\$70	2 days in lab

Expedited same-day designs are available. Call your technical representative for pricing.
