

Pala® Mix & Match

Pala Mondial/Pala Mondial i

Mould Charts

That's Prosthetics.

The Pala Mix & Match combination principle: The freedom to combine aesthetic and functionality at your will.

Combining CAD CAM technology and the INCOMP procedure maintains our exemplary form and functional accuracy. You always receive reliable, dependable shade values for all Pala denture teeth and thus an even better adaptation to facings and any residual dentition.

Mondial and Mondial i provide maximum flexibility with reliable, easily set up dentures for all indications. Identical manufacturing processes and materials as well as excellent color stability permits the lines to be combined freely.

Anterior Indications <small>Even better through new tooth moulds R8, S8, L24, and L19</small>			
Mondial 6	 Full Denture	 Implant-Borne Denture	 Partial Denture
Mondial 6i	 Implant-Borne Denture	 Partial Denture	 Full Denture

Posterior Indications			
Mondial 8	 Full Denture	 Implant-Borne Denture	 Partial Denture
Mondial 8i	 Partial Denture	 Implant-Borne Denture	 Full Denture

Introducing Pala Mondial i –

The new line extension within Mondial, featuring additional new moulds for the anterior and an added 33° for the posterior.

Mondial i carries additional features such as increased transparency and an enhanced incisal edge for those special cases or customers who require enhanced characteristics. The multiple layers of dentin and enamel are blended to create a natural, lifelike effect and are easily integrated with residual dentition.

Use Mondial and Mondial i together to create the perfect custom smile according to the patient's wishes and your preference, ensuring 100% customer satisfaction.

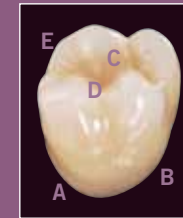

Mondial i - the facts

- Denture Acrylic with NanoPearls® for high abrasion resistance and lifelike opalescence
- Our teeth can be applied to any set-up concept or for eugnathic and disgnathic jaw relationships and give the technician greater flexibility.
- True to nature moulds identical with natural teeth
- Indistinguishable from residual dentition
- Widened base and increased volume for improved papillae contouring

Mondial 6i Anteriors

- A Variable cervical area
- B Wide tooth base
- C Lifelike labial surface
- D Layering simulates natural teeth
- E 3D-Multilayering
- F Naturally contoured labial surface

Mondial 8i Posteriors

- A Variable cervical area
- B Wide tooth base
- C Occlusion design allows lingual and balanced occlusion set-up
- D Width of occlusal surface similar to natural teeth
- E Provision for spot grinding in the incisal edge

The new anteriors have significantly more volume and are a prominent highlight of the extended Pala Product range.

- A widened base, greater use of tooth length and depth through greater volume, improved overall aesthetics, easier masking
- Less concave palatal areas means lower lateral forces and higher stability
- Larger proximal areas mean best possible proximal closing and better overall aesthetics
- Rounded canines give patients a more natural appearance

Main Indications

- Implant-borne and fixed-removable prosthetics
- Veneering technique, exclusive full denture prosthetics

Anteriors widen the Mondial i Portfolio

New Moulds R8, S8, L19, L24

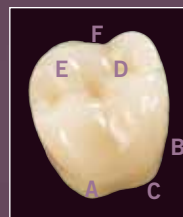

Mondial - The facts

- Fast and unambiguous set-up
- Precisely defined centric means simple set-up
- Precise function without time consuming spot grinding
- NanoPearls guarantees high abrasion resistance and durability
- Lifelike and vivid surface structures match the basic tooth form and appear harmonious.
- Widened tooth base and increased volume aid papillae contouring and eliminate dark recesses and vertical edges.

Mondial Anteriors

- A Variable cervical area
- B Wide tooth base, soft transition
- C Lifelike surface structure
- D Layering + Material = Opalescence

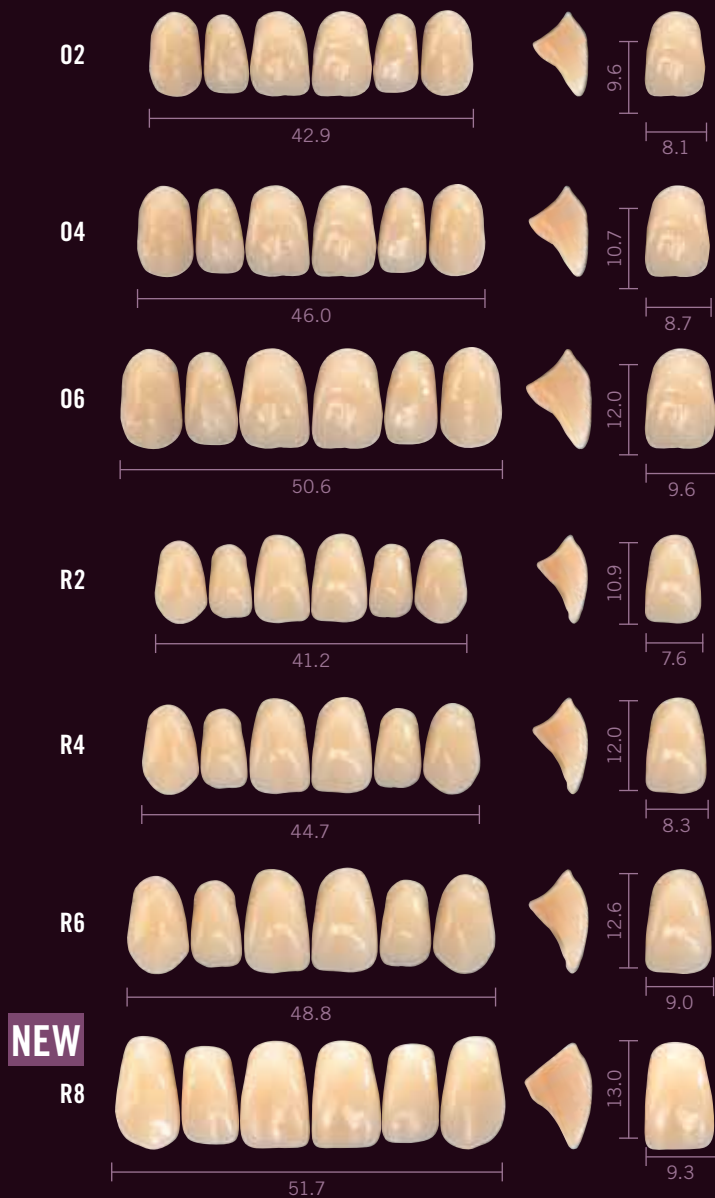

Mondial Posteriors

- A Variable cervical area
- B Wide tooth base
- C Bilaterally digitalized, symmetrical
- D Functionally improved occlusal design
- E Provision for spot grinding in the incisal edge
- F Lifelike cusp design

Pala Mondial is the time tested denture tooth that meets all the requirements of modern dental technology. It is the first line of denture teeth to feature NanoPearls and guarantees highest abrasion resistance. The large selection of mould designs provides much flexibility when choosing teeth for the denture.

*Heraeus Shades are equivalent to Vita Shades. Mondial® and Mondial i are available in 18 shades (A1–D4 and BL2 and BL3).
Heraeus Kulzer teeth meet and exceed all the requirements of EN ISO 22112:2006 and ANSI/ADA Specification No. 15-1999.

Pala Mix & Match Shade Guide

Mondial is a registered trademark of Heraeus Kulzer, GmbH.

Portrait, Bioform, Bioblend, Trublend and IPN are registered trademarks of Dentsply International, Inc.
BlueLine and Phonares are registered trademarks of Ivoclar Vivadent.

High Technology:

Absolutely consistent, high quality every time

- Computer aided development and manufacturing (CAD/CAM) for highest precision
- The result: Guaranteed identical pairs as well as authentic function and size

The Patent:

The unrivaled NanoPearls® filler material

- The NanoPearls filler is patented and consists of a unique micro filler combined with a viscoelastic nano filler
- The result: The highest abrasion resistance and high fracture resistance for a significantly greater lifespan

The Characteristics:

No bubbles, no porosity – reliability

- The INCOMP manufacturing process ensures bubble and porous free acrylic teeth with extremely high density
- The result: Reliable and consistent quality in every tooth

The Durability:

Studies demonstrate abrasion resistance

- Independent studies at Heidelberg University and Charité University Medical Centre in Berlin show that abrasion resistance is 50 % higher than in conventional PMMA materials
- The result: Long-lasting, quality dentures with a 12-year manufacturer's warranty

Testimonials

"The exceptional 3D Multilayering of Pala Denture Teeth is a breakthrough in esthetics. By using this technique, the combination creates such a natural appearance that it is difficult for me to tell the difference between natural teeth and Pala Teeth."

*Daxton Grub,
President of R-dent Dental Laboratory*

"The Mondial line with its NanoPearls technology and natural layering will set a totally new standard in the way we look at denture teeth. With the quality and selection of moulds this will definitely be my choice."

*T.G. Hornischer,
CDT*

"We now use Pala Denture Teeth as they provide me and my patients with everything that I could wish for in terms of aesthetics and clinical performance."

*Paulo Malo,
President and CEO of the
Malo Clinic Health Group*

"Working with Heraeus Teeth is an absolute pleasure! They exhibit natural contours, smooth transition to the cervical area, and layering for the depth of shade, opalescence and natural fluorescence. Another advantage is with the CAD/CAM manufacturing process, affording the clinician prosthetic teeth which provide 100% identical pairing; resulting in consistent quality, performance, and excellent esthetics."

*Aldo Leopardi,
BDS, DDS, MS Prosthodontist*

"The biggest concern for denture wearers is that their dentures may look "fake". Since using Heraeus' Mondial teeth, fake looking dentures are no longer a concern for me or my patients. These highly precise CAD-CAM fabricated teeth possess extremely lifelike optical properties such as opalescence, fluorescence, and are very natural looking, strong and attractive."

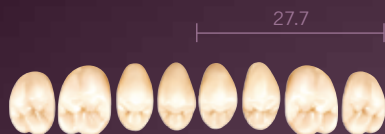

*Abdi Sameni,
DDS*
